

YASHPAL SAINI

Data Analyst | SQL · Python · A/B Testing · Financial Analytics

New York, NY | (646) 289-1606 | yashsaini30668@gmail.com | [Technical Portfolio](#) | [LinkedIn](#) | [GitHub Profile](#)

SUMMARY

Data analyst with 2+ years running statistically rigorous experiments, building analytics infrastructure, and translating complex datasets into product and business decisions. Background spans A/B testing and attribution modeling through to financial reporting and budget analysis, with a track record of working across technical and non-technical teams to deliver work that gets used.

AREA OF EXPERTISE

SQL · Python (Pandas, SciPy, Scikit-learn) · BigQuery · Snowflake · dbt · Tableau · Power BI · Looker · A/B Testing · Funnel Analysis · Cohort & LTV Analysis · Attribution Modeling · Customer Segmentation · Financial Reporting · Dashboard Development · GA4

EXPERIENCE

Research Foundation of CUNY | New York, NY

Aug 2025 – Present

Data Specialist Intern (Graduate Internship, part-time while pursuing M.S.)

Analytics and consulting firm delivering data solutions to enterprise and SMB clients across CRM, digital marketing, and business intelligence.

- Rebuilt 7 fragmented data sources into a unified BigQuery warehouse with automated SQL pipelines, cutting insight delivery time by 55% for 26 institutional stakeholders.
- Architected data quality frameworks catching anomalies at ingestion and governance controls covering access permissions and audit trails, improving data accuracy by 37%.
- Constructed financial KPI frameworks in Power BI with DAX time intelligence functions, delivering executive reports across 26 institutions and cutting ad hoc data requests by 40%.
- Automated recurring data collection across 26 sites using Power Automate, cutting manual effort by 60% and keeping data fresh for downstream analytics and reporting cycles.

I3 Infosoft Pvt. Ltd. | Noida, India

Sep 2022 – Jul 2024

Data Analyst (Full-time)

Research foundation supporting data infrastructure and analytics for 26+ CUNY colleges across New York City.

- Implemented a Python segmentation model in Scikit-learn across 1M+ CRM records, identifying high-value cohorts via LTV and behavioral analysis that improved product engagement by 18%.
- Ran A/B experiments using SciPy with pre-registered hypotheses and significance thresholds, delivering ROI improvements and quarterly strategy shifts across three product lines.
- Designed Tableau and Looker dashboards using LookML dimensions tracking 15+ KPIs across 3 business units, giving leadership same-day performance visibility.
- Produced P&L reports and budget vs. actuals trackers in Excel using array functions and power pivots, presenting revenue variance analysis to finance leads and senior management.

PROJECTS

Enchanted AdLab | [Live App](#) | Python, Streamlit, SciPy, Scikit-learn, DuckDB

Mar 2026

- Developed an A/B testing decision-support app in Python that helps teams compare experiment results, evaluate segment-level lift, and estimate revenue impact before making launch decisions.
- Included automated test selection, SRM checks, sequential monitoring, and a DuckDB SQL workspace for analyzing user and revenue data.

Revenue Drop Diagnosis + Attribution | [Live Demo](#) | SQL, Python, Scikit-learn, GA4, Tableau

Mar 2026

- Used SQL window functions to isolate a 23% revenue decline to one segment and a 2-week window, identifying 3 root causes across pricing mix.
- Scikit-learn attribution showed 2 channels drove 78% of revenue at 3.5x ROAS while 3 others consumed 40% of budget with near-zero return.

Customer Churn Prediction | [Model Repository](#) | Python, Scikit-learn, SQL, Tableau

Oct 2025

- 84% accurate Random Forest across 50K+ records, segmenting churn risk into 3 tiers with \$140K estimated retention value at stake.
- Top predictors (tenure, usage frequency, contract type) used to target interventions at the highest-risk lifecycle stages.

LEADERSHIP & ACTIVITIES

Baruch College, Office of Student Life | New York, NY

Mar 2025 – Present

Assistant Budget Specialist

- Manage a \$1.03M annual budget across 140+ student clubs, analyzing expenditures against allocations and flagging variances.
- Process reimbursement requests across 110+ undergraduate and 25 graduate clubs, reconciling receipts and maintaining audit trails.

EDUCATION

Baruch College, Zicklin School of Business

Expected May 2026

M.S. in Business Analytics, GPA: 3.6/4.0 | Coursework: Statistical Modeling, Data Mining, Applied Regression, Machine Learning

Award/Recognition: Pliner Bloom Scholar
